**2. Whether the figures have been audited, or reviewed and in accordance with which standard or practice.**

The figures have not been audited or reviewed.

**3. Where the figures have been audited or reviewed, the auditors' report (including any qualifications or emphasis of matter)**

Not applicable.

**4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied**

The Group adopted the following new and revised FRS issued in July 2004 by the Council on Corporate Disclosure and Governance :

FRS 103	Business Combinations
Revised FRS 36	Impairment of assets
Revised FRS 38	Intangible Assets

Under these standards, goodwill can no longer be amortised and charged to the income statement. Instead, such goodwill will be tested for impairment in accordance with FRS 36.

**REVIEW OF OPERATING PERFORMANCE FOR THE QUARTER ENDED 30 JUNE 2005 vs QUARTER ENDED 31 JULY 2004**

**4QFY05**

With effect from FY05, the Group changed its financial year end from 31 July to 30 June. As a result, 4QFY05 reflected the performance of the Group for only two months of operations, from May05 to Jun05, compared with three months in 4QFY04.

Despite having only two months of operations, Group turnover for the quarter ended 30 Jun 2005 (4QFY05) at S\$42.8 million, was 6% higher compared with S\$40.6 million for 4QFY04. The strong performance reflected continued buoyant demand from the Marine and Oil sectors that the Group serves.

With a higher inventory carrying cost compared to the previous corresponding period, 4QFY05 gross margin moderated to 22.7%, from a high 35.4% in 4QFY04.

Staff costs for 4QFY05 was \$1.7 million compared with 4QFY04 of \$4.1 million. The higher amount recorded for 4QFY04 was because provision for bonus and profit sharing were only accrued in the 2<sup>nd</sup> half of FY04 as a result of the significantly stronger performance of the Group in the 2nd half of FY04.

Other operating expenses of \$170k was substantially lower than \$1.9 million of the previous corresponding quarter due to a foreign exchange gain of \$922k, a shorter quarter and lower allowance for doubtful receivables of 94k (4QFY04:\$397k).

**REVIEW OF RESULTS FOR ELEVEN MONTHS ENDED 30 JUNE 2005**

**Turnover**

Despite only 11 months' operation for FY05, Group turnover increased 84.9% from \$106.9 million in FY04 to \$197.8 million for the financial period ended 30 June 2005. The increase was mainly attributed to continued strong demand, particularly from the booming Marine and Oil sectors.

Year-on-year comparison was also boosted by the first full year contribution by wholly owned subsidiary, Hoe Seng Huat Pte Ltd, which was acquired in January 2004. This effect had also contributed to the higher expenses incurred in the period ended 30 June 2005 compared to the corresponding period of the previous financial year.

The increase in the turnover and higher steel prices resulted in FY05 cost of goods sold rising 106.5% from \$73.4 million to \$151.7 million for the period ended 30 June 2005. Nevertheless, the higher turnover and profitability for the enlarged Group underpinned gross profit growth of 37.6% to S\$46.1 million for the 11 months ended 30 Jun 2005, up from S\$33.5 million for FY04.

### **Staff costs, Depreciation, Other operating expenses and Finance cost**

Staff costs rose 8.0% to \$10.5 million compared with \$9.7 million for the corresponding period due mainly to higher headcount for the enlarged group and provision for higher bonus on the back of FY05's strong financial performance.

Other operating expenses rose to \$5.4 million from \$5.0 million due to higher trading volume and full-year expenses for the integration of the steel plate business into the Group, for the financial period ended 30 June 2005.

Net finance cost of \$2.6 million was mainly made up of trust receipts interests and unrealised foreign exchange loss incurred in the normal course of business compared to \$0.4 million of the corresponding period. The increase in the balance of trust receipts was largely due to higher working capital funding required to support the increase in trading volume.

### **Profitability review**

Profit before tax rose nearly 53.7% from \$17.7 million to \$27.3 million.

In view of the higher profit recorded, provision for tax also rose in tandem from \$3.9 million to \$5.7 million.

### **REVIEW OF FINANCIAL POSITION AS AT 30 JUNE 2005**

#### **Non current assets**

In accordance with the revised accounting standard FRS 103 on Business Combination, no amortisation of goodwill has been taken up for the period ended 30 June 2005. Management has reviewed goodwill in accordance with FRS 103 and revised FRS 36 and concluded that no impairment to goodwill is necessary.

#### **Current assets and current liabilities**

The Group had a cash and cash equivalents of \$19.4 million for the period ended 30 June 2005.

Trade and other receivables rose to \$55.0 million from \$30.0 million as a result of higher turnover reported for the period.

Inventories on hand also increased to \$67.5 million from \$34.1 million in order to fulfill secured orders and in view of the continued demand for steel products.

Trade payables decreased from \$3.5 million to \$2.8 million while other payables and accruals increased from \$5.4 million to \$6.1 million.

Increase in borrowings was made up of mainly trust receipts incurred during the ordinary course of business and short term bank borrowings. The increase to \$58.8 million from \$9.6 million was due largely to higher working capital funding to support the increase in trade volume.

#### **Non current liabilities**

Non current borrowings fell from \$7.9 million to \$1.3 million due to repayment of bank loan.

## **Share capital and reserves**

### **9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results**

No forecast or a prospect statement has been previously disclosed to shareholders.

### **10. A commentary at the date of the announcement of the competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months**

The Group experienced exceptional revenue growth in the last financial year due to strong demand and tight supply of steel products. The Group expects demand for its steel products to remain strong, especially from customers in the shipbuilding, rig building and related businesses in the oil & gas industries. The escalating demand for oil has caused oil prices to stay well above US\$50 per barrel and will generate more oil exploration activities. This will translate into a greater need for oil rigs and boost down stream activities like oil refining and construction of more oil storage facilities which will in turn create demand for steel products. In addition mega-infrastructure projects such as the Integrated Resorts, Business and Financial Centre and the new downtown at Marina Bay will create further demand for the Group's products.

With the ability to offer a comprehensive range of steel products, the Group seeks to improve turnover by being a one-stop shop for its customers. The Group has expanded beyond its traditional stronghold in the carbon steel market, and started offering stainless steel products and will look into supplying higher quality materials in response to changing market requirements. The Group is also expanding its sales network to capitalize on the booming demand in countries like Indonesia and Malaysia, and looks to supplying to new markets in Indochina and the Middle East. Underlying demand is expected to remain firm due to strong order backlog for many of the Group's customers.

The supply for steel products has improved in recent months in response to the robust market demands. The price of certain categories of steel products has stabilised and the Group will leverage on its ability to secure bulk purchases from key suppliers to mitigate pressure on its margin. The Group foresees that customers would be more prudent with respect to the timing of placing their orders and hence expects turnover to be evenly spread in the coming quarters.
