Net Asset Value per ordinary share (cents)	32.02	32.36	24.05	23.19

8. **A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. It must include a discussion of the following:-**
- (a) any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors; and**
 - (b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on**

REVIEW OF OPERATING PERFORMANCE

Turnover & margin

Revenue for the 4th quarter ended 30 June 2009 ('4QFY09) declined 52% to \$67.5M from \$141.9M reported for the 4th quarter ended 30 June 2008 ('4QFY08) due to falling selling prices of structural steel products and pipes. The decline in revenue was also caused by the slump in demand for steel products as a result of the global recession.

As a result of this global economic downturn, the Group reported a lower revenue of \$321.7M for the year ended 30 June 2009 ('FY09') compared with \$433.7M reported for a year ago ('FY08').

Consequently, gross profit margin for 4QFY09 fell to 11.7% compared with 23.8% achieved for 4QFY08. The depressed gross profit margin was mainly caused by the steep correction in the selling prices of structural steel products in FY09. Allowance for the diminution in value for certain group of inventories had been made as selling prices fell below the holding costs.

Other operating income

Other operating income for 4QFY09 fell 93% to \$44K from \$587K in 4QFY08 mainly due to lower dividend income received in the reporting quarter.

Expenses

Staff cost, Depreciation, Other operating expenses & Finance cost

Staff cost in 4QFY09 decreased 59% to \$1.9M from \$4.8M in 4QFY08 due mainly to lower headcount, reduction in salaries as part of cost cutting measures implemented in FY09 and lower provision of bonuses as a result of lower profits. Receipts from the government job credit scheme also contributed to the reduced staff cost.

During this period, depreciation rose slightly to \$418k from \$413k as a full year of depreciation charge was taken in FY09 for the warehouse that was purchased in February 2008.

Other operating expenses fell to \$2.8M in 4QFY09 from \$5.3M in 4QFY08 mainly due to lower volume of sales following the slump in the global economy. Various cost cutting measures implemented in the second half of FY09 had also contributed to the lower expenses.

There was a net finance gain in 4QFY09 of \$221k compared to an expense of \$747k in 4QFY08 due to the weakening of the US dollars during the quarter reported. For the full year, net finance cost was \$3.6M comprising trust receipts' interest expense of \$1.4M (FY08:\$2.6M) and exchange loss arising from trust receipts of \$2.2M (FY08: gain of \$2.8M) compared to a net finance gain of \$173k in FY08. The exchange loss was mainly incurred in the first half of FY09 when the US dollar strengthened against the Singapore dollar and a higher outstanding balance of trust receipts.

Tax expense for 4QFY09 was \$0.5M (4QFY08 : \$4.5M) while the tax expense for FY09 was \$2.8M (FY08:\$9.9M) after adjusting for interest income taxed at concessionary rates, non taxable receipts from job credit scheme and other adjustments.

Profitability review

With a lower revenue reported for 4QFY09, profit after tax declined 86% to \$2.6M from \$18.7M for 4QFY08. The sharp correction in selling prices brought on by the global recession led to profit after tax for FY09 falling 69% to \$14.1M from \$45.1M reported for the preceding financial year.

REVIEW OF FINANCIAL POSITION AS AT 30 JUNE 2009

Non current assets & non current liabilities

Balance for Available-for-sale financial assets was higher due to an investment in interest bearing preference shares issued by a local bank during the year. Although equity market has been improving recently, it has not recovered to the level a year ago and hence accounted for the smaller balance in the Fair Value Reserve account.

Current assets and current liabilities

Trade and other receivables declined to \$62.5M from \$109.0M reflecting the Group's emphasis in debt collection amidst the economic downturn. This collection allowed the Group to repay its liabilities faster resulting in the Group's borrowings falling sharply to \$4.2M from \$64.7M and trade and other payables to \$20.9M from \$42.7M. In addition, holding of cash and cash equivalent also rose almost twofold to \$53.5M from \$27.4M.

During the year, the Group also decided to run down its inventories due to falling sales prices and lower demand. Together with a slower purchasing programme, the balance of inventories reduced from \$137.7M to \$67.1M at the end of the financial year.

With the lower profit after tax reported for FY09, current income tax liabilities fell correspondingly to \$2.9M from \$9.5M.

Cash flow

The Group generated an operating cash inflow of \$106.6M compared to an utilisation of \$22.2M in the previous year which was a result of faster debt collection and a reduced purchasing programme pursued during the financial year. This enlarged stream of cash inflow hence allowed the Group to pay down its borrowings which were mainly in the form of trust receipts and thereby reducing its gearing to 0.02 at the end of FY09.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results

No forecast or a prospect statement has been previously disclosed to shareholders.

10. A commentary at the date of the announcement of the competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

Prices for most of the structural steel products had risen by about 20% since March 2009 but market demand for these products remains soft. Demand is not likely to pick up significantly unless government infrastructure projects move into the construction phase which probably will happen in the next 6 months. Meanwhile, the Group expects shipbuilders to continue purchasing stocks on a when-needed basis.

The slump in economic activities is exerting downward pressure on the selling prices for the Group's pipes and fittings products and margins are expected to be affected. Likewise, the Group expects demand for these products will remain soft. However, higher oil prices may spur increase in activities in the oil and gas sector which in turn may drive demand up for these products in the coming quarters.

Although it is generally believed that the global economy has bottomed out, recovery is likely to be muted and prolonged. As such, the Group does not expect the local economy to expand quickly and hence demand for its products will remain stagnant in the near term. The Group, however, expects selling prices to remain stable and margins firmer.

In the last 2 quarters, the Group had taken strategic actions in reducing its inventory holding, stepping up its debts collection and pay down its borrowings. The combined results of these actions were an increase in cash holdings and a significant reduction in its borrowings. These had served to strengthen banks' confidence in the Group and would position it well in seizing opportunities in its stock replenishment programme eventually. In addition, it will also provide the Group with the necessary resources to participate in any merger and acquisition activities that may arise.

Business conditions ahead will remain challenging for the Group but it will have sufficient reserves to weather the downturn. The Board of Directors expect market sentiment to improve only in the second half of the new financial year.

11. Dividend

(a) Current Financial Period Reported On

Any dividend declared for the current financial period reported on?

Name of Dividend Tax exempt (one-tier)	Final
Dividend Type	Cash
Dividend Amount per share	1.0 cent
