(b) any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on

Revenue

Revenue for 3 months ended 30 September 2008 ('1QFY09') rose strongly by 56% to \$111.7M as compared to \$71.7M for 3 months ended 30 September 2007 ('1QFY08'). The higher revenue in 1QFY09 was partially due to higher selling price achieved for the Group's steel products and stronger demand from its 3 main customer segments namely oil & gas, marine and construction when compared to 1QFY08.

In line with higher revenue achieved, gross profit for 1QFY09 rose 73% to \$28.3M from \$16.4M (1QFY08). The gross profit margin for the Group also increased to 25.4% from 22.9% (1QFY08) as a result of better prices achieved in 1QFY09 for most of the Group's products.

Staff costs, Depreciation, Other operating expenses and Finance cost

Staff costs rose 23% to \$3.5M from \$2.9M mainly due to higher provision for incentives and higher headcount in line with increased sales.

Depreciation expenses increased by 10% to \$418K from \$379K mainly due to depreciation attributed to the purchase of a new warehouse in February 2008.

Other operating expenses rose 141% to \$9.4M compared to \$3.9M for 1QFY08 due mainly to a provision for a write down of inventory of \$6.5M.

Finance expenses rose to \$804K from \$401K mainly due to foreign exchange loss of \$350K (1QFY08: \$10k exchange gain) as US dollars strengthened during the quarter.

Profitability review

Net profit after tax for 1QFY09 rose 62% to \$11.9M from \$7.4M as reported for 1QFY08. This was in line with the higher revenue and margin achieved for the quarter. Net profit margin was 10.7% which was comparable to 10.3% achieved in 1QFY08 and would have been better had it not been for the provision for inventory.

REVIEW OF FINANCIAL POSITION AS AT 30 SEPTEMBER 2008

Non current assets

Financial assets, available-for-sale, increased to \$8.3M from \$7.4M. This increase was due to an investment in a fixed income instrument amounting to \$1.5M.

Current assets and current liabilities

Trade and other receivables decreased to \$91.0M from \$109.0M as at the end of the last financial year ended 30 June 2008 as a result of the Group putting in more effort in collection of its debts in the midst of the financial market turmoil.

Inventories decreased slightly to \$129.9M (4QFY08: \$137.7M), in line with the Group strategy to adjust inventory level in response to the prevailing market demand and supply conditions.

Trade and other payables and borrowings decreased to \$17.3M and \$54.8M from \$42.7M and \$64.7M respectively due to reduction in inventory purchases during the quarter.

Share capital and reserves

Fair value reserves decreased to \$413k from \$1.0M mainly due to the fall in prices quoted for the financial assets available for sale, as a result of the weakening global financial market.

Cashflow

The Group generated a positive operating cash inflow of \$14.3M during the quarter from improved debt collection and better working capital management. Overall, balances of cash and cash equivalent improved to \$29.3M at end of 1QFY09. The current ratio improved to 3.02 from 2.35 (4QFY08) while the net gearing of the Group improved to 0.14X from 0.2X (4QFY08).

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results

No forecast or a prospect statement has been previously disclosed to shareholders.

10. A commentary at the date of the announcement of the competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

The recent financial market turmoil and signs of slowdown in the US and global economies had dampened global demand for steel products. Demand is expected to slow down in the next quarter and to remain soft until confidence returns to the financial markets.

Due to a rapid softening demand for steel plates globally during this period, plates' prices declined more steeply than expected. Some mills had planned to reduce production in the hope that such action would arrest the decline in prices. Locally, many of the Group's customers had adopted a cautious approach to purchasing, buying only to meet immediate needs and based on the most competitive offer. As a result, the Group made a provision for inventory write down to reflect the situation in 1QFY09 and will continue to monitor its inventory closely in the coming quarters. So far, selling prices for most of the other products remain healthy.

However, management believes that local demand for structural steel products, pipes and fittings has not materially changed but only been deferred in the light of the current economic conditions. Certain key infrastructural projects remain ongoing which include the upgrading of Changi Airport Terminal 1, new Downtown MRT line, Marina coastal highway, Khoo Teck Puat Hospital and the Sports Hub. The Group's

offshore and marine customers will need to continue to fulfill their strong order books that stretch up to 2011. These activities will continue to provide support to the Group's business.

The local market is also hoping that the government will restart projects that were deferred earlier to provide support in the near term.

The Group will monitor the fluctuations in steel prices closely and cautiously time its inventory replenishment in response to market conditions. It also aims to strengthen its working capital position in order to take advantage of the eventual market recovery.

The strong cash position of the Group will help to cushion any negative impact that may arise from the downturn in the global economy. At the EGM held at the end of October, the shareholders had given a mandate for the Company to buy back its shares when appropriate.

In line with the Company's initiatives announced earlier in the year that it was actively pursuing acquisition and other business development opportunities, the Company has retained a financial adviser to work with the Company to identify opportunities to grow and diversify the Company's business.

The Board of Directors expect market conditions to remain challenging in the near term but believes that the Group will be able to leverage on its management's experience of more than 60 years in the steel business and Hupsteel's strong balance sheet to ride out the current economic uncertainty.
