On 8 November 2005, the company announced a bonus issue of shares of 1 for 5 existing shares which was subsequently approved by the SGX on the 3<sup>rd</sup> January 2006. The bonus issue of shares of 60,309,790 was credited as fully paid by transferring the amount of \$6,030,979 from the Share Premium account to the Share Capital account. Hence the number of fully paid up shares of \$0.10 each increased from 301,459,000 to 361,858,790. These new shares were allotted and credited to the shareholders' account and were listed on the SGX on 25<sup>th</sup> January 2006.

Not applicable.

**4. Whether the same accounting policies and methods of computation as in the issuer's most recently audited annual financial statements have been applied**

The same accounting policies and methods of computation as in the most recently audited financial statements have been applied except as disclosed in Note 5.

**5. If there are any changes in the accounting policies and methods of computation, including any required by an accounting standard, what has changed, as well as the reasons for, and the effect of, the change**

Changes in accounting policies

In 2005, the Group and the Company adopted the Financial Reporting Standards (FRS) below. The 2004 comparatives have been amended where as required, in accordance with the relevant transitional provisions in the respective FRS.

A brief description of those FRS which have an impact on the financial statements of the Company and of the Group had been set out in the first quarter financial result announcement.

The adoption of these FRS did not have a material effect on the operating results for the second quarter of 2005 and for the half-year ended 31 December 2005.

#### **REVIEW OF OPERATING PERFORMANCE FOR THE QUARTER ENDED 31 DECEMBER 2005 vs QUARTER ENDED 31 JANUARY 2005**

Underlying demand for steel products remained buoyant. While the Group recorded a 10% increase in overall sales quantity, revenue for the quarter ended 2QFY06 declined by 12% to \$45.9m, down from \$52.2m in 2QFY05, due mainly to lower unit prices for steel plates. Prices for the Group's other steel products remained relatively stable during the quarter.

The last financial year ended 30 June 2005 (FY05) had been an exceptional year for the steel industry with record prices for steel products. However, prices had since retreated from record high as mills began to increase their supply since the middle of 2005. In particular, price correction for steel plates had been more pronounced. The market overstocking of steel plates at the end of the third quarter of 2005 had resulted in some industry players adopting aggressive pricing strategies that had affected the performance of the Group in the first two months of 2QFY06.

Despite weaker prices, demand remained healthy and this had allowed the Group to sharply reduce its steel plate inventory. The weaker performance of steel plates was well cushioned by the consistent and stable performance of the Group's other steel products. The 2QFY06 gross profit margins for the Group was 17.7%, down from the 20.1% achieved in 2QFY05, but slightly above the 17.6% achieved in 1QFY06. The Group achieved gross profit of S\$8.1m in 2QFY06, a 3.9% improvement over 1QFY06.

Staff expenses were sharply lowered by 44% to \$1.9m due to smaller provision for performance bonus. Other operating expenses increased by 14% were mainly because of expenses incurred for the Group's 60<sup>th</sup> anniversary celebrations.

#### **REVIEW OF RESULTS FOR THE HALF YEAR ENDED 31 DECEMBER 2005**

##### **Turnover**

For the half year ended 31 December 2005, revenue rose 4% to \$90.5m from \$87.0m over the corresponding period. The higher turnover achieved was a reflection of the sustained demand for steel products by the market although prices were weaker compared to the corresponding period.

Cost of goods sold rose 17% to \$74.5m from \$63.9m on the back of higher inventory costs. Pricing pressure on steel plates over the period of September to November 2005 also impacted overall gross profit margins for the Group, which declined to 17.7% compared to 26.5% achieved in the previous half year ended 31 January 2005 (1HFY05). 1HFY05 performance was also boosted by the exceptionally high selling prices for all steel products due to supply shortages, which had since improved in the second half of 2005. Gross profit for the half year ended December 2005 was \$15.9m compared to \$23.1m in the previous half year ended 31 January 2005.

##### **Staff costs, Depreciation, Other operating expenses and Finance cost**

Staff costs were lower by 36% to \$3.9m due to a smaller provision for bonus on the back of lower profit. Despite higher expenses incurred in 2QFY06 for the Group's 60<sup>th</sup> anniversary celebrations, other operating expenses declined by 30% to \$3.3m from \$4.7m through better cost control of overheads.

Finance costs increased to \$805,000 from \$124,000 due to rising interest rates and comparatively higher working capital financing needed to support the increase in sale volume.

## **Profitability review**

The Group achieved a commendable 1HFY06 net profit after tax of \$6.2m.

## **REVIEW OF FINANCIAL POSITION AS AT 31 DECEMBER 2005**

### **Non current assets**

In accordance with the revised accounting standard FRS 103 on Business Combination, no amortisation of goodwill has been taken up for the period ended 31 December 2005. Management has reviewed the goodwill in accordance with FRS 103 and the revised FRS 36 and concluded that no impairment of goodwill is necessary.

### **Current assets and current liabilities**

Trade and other receivables were lower at \$44.8m compared with \$55.1m due to lower turnover in the quarter and better collection effort for the quarter ended 31 December 2005.

Inventory holdings were reduced to \$51.5m from \$67.5m at June 2005. With a declining steel price environment, the Group took the strategic decision to reduce its inventory holdings so that the Group would be in the position to re-stock at a more attractive cost later.

Trade and other payables rose to \$4.2m from \$2.8m while borrowings declined significantly to \$27.5m at end December 2005, down from \$60.1m in June 2005. Better working capital management had resulted in a stronger operating cash flow during the period under review and the cash generated was used to repay the maturing trust receipts.

### **Non current liabilities**

The decrease in the non current borrowings was due to reclassification of portion of the term loan to current liabilities as they matured.

### **Share Capital & reserves**

On 8 November 2005, the company announced a bonus issue of shares of 1 for 5 existing shares which was subsequently approved by the SGX on the 3<sup>rd</sup> January 2006. The bonus issue of shares of 60,309,790 was credited as fully paid by transferring the amount of \$6,030,979 from the Share Premium account to the Share Capital account. Hence the number of fully paid up shares of \$0.10 each increased from 301,459,000 to 361,858,790. These new shares were allotted and credited to the shareholders' account and were listed on the SGX on 25<sup>th</sup> January 2006.

### **Cash flow**

The Group generated a positive operating cash inflow of \$15.1 million for the quarter and \$32.7 million for the half year ended 31 December 2005. The Group was able to do this by reducing the Group's inventory holdings and tighter receivables' collection. The positive cash flow had enabled the Group to repay a significant portion of its borrowings which made up mostly of trust receipts as they matured. This would also allow the Group to position itself to make purchases when prices of steel supplies become more favourable in the future.

**9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results**

No forecast or a prospect statement has been previously disclosed to shareholders.

**10. A commentary at the date of the announcement of the competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months**

Underlying demand for the Group's steel products is expected to remain firm, underpinned by the strong order backlog for the Group's major customers in the Marine and Oil & Gas sectors. The major ship and rigbuilding yards' recent announcements of new orders also point to the sustainability of demand, especially for the Group's steel products. Meanwhile, expectations are for the construction sector demand to pick up in the second half of 2006, which would boost demand for the Group's structural steel products.

Outlook for structural steel products has improved with market supply and prices stabilised in December 2005. Demand for the Group's other steel products will remain strong and is expected to continue into the 2<sup>nd</sup> half of the financial year.

In the circumstances, the Directors expect gross profit margins to remain stable in 2HFY06.
